Internet Connection Status

Connected

- 1 Turn on the Wi-fi
- 2 Select the Wi-fi
- 3 Check "Show Password"
- 4 Enter the Password
- 5 Tap 'CONNECT'
- 6 Confirm the mirror has 'Connected' to the selected Wi-fi
- 7 Go back to the settings menu and confirm if you see the green cloud icon.

Wi-fi Settings are all DONE

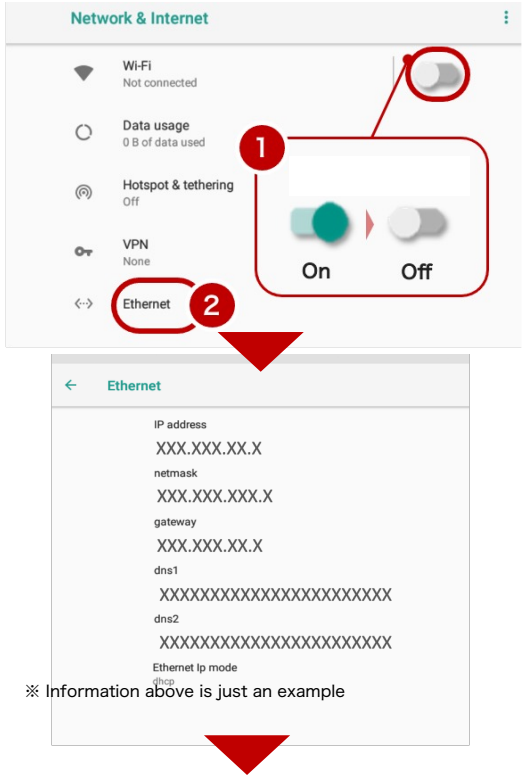

! Please refer to the “**? Trouble Shooting**” document, if you have any problem connecting to the internet.

! "Connected/Online" cloud icon does not mean the mirror is connected to the internet. It means that the mirror is connected to the internet device (like a router.)

Hard-Wired Internet (B)

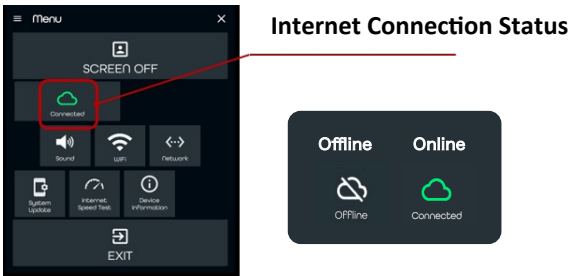

Please confirm that you have already connected the LAN cable.

- 1 Turn OFF the Wi-fi
- 2 Tap 'Ethernet'
- 3 Confirm all the internet information

If you see all the information written by '0' the mirror is not connected to the internet.

- 4 Go back to the settings menu and confirm if you see the green cloud icon.

Hard-Wired Internet Settings are all DONE

Please refer to the “ Trouble Shooting ” document, if you have any problem connecting to the internet.

“Connected/Online” cloud icon does not mean the mirror is connected to the internet. It means that the mirror is connected to the internet device (like a router.)

04 Select the Site

If you see the mirror freezing on a black screen with either "..." or "Connecting..." written, please confirm if the infrared camera is turned on and/or connected.

Or, please see P12 of the " ? Troubleshooting" manual for further help.

Smoothness	Roughness		 Quite a few	 A Little	
	Dryness		 Quite a few	 A Little	It will zoom into the place where you tap.
	Visible Pores		 Quite a few	 A Little	

11 Safety Precautions and Warnings

Terms of Use

- **Do not remove the anti-reflection film pasted on the mirror**

Anti-reflection film is applied to mirrors that do not have anti-reflective coating.
If the mirror already has an anti-reflective coating, there is no film attached.

- How to identify an anti-reflective film

- Check the serial number on the top of the mirror.

- If the serial number starts with "G"

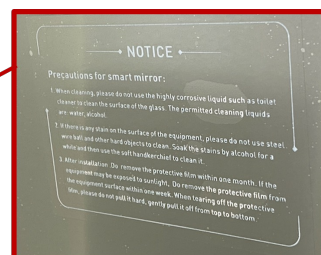

The mirror has an anti-reflective coating, so no anti-reflective film is applied.

- If the serial number does not start with a "G"

Anti-reflective film is applied since the serial number does not have anti-reflective coating.

- Film to be peeled off →

"Notice" is written on the film

- Diagnostic results are displayed for 5 minutes

- If you do not touch the screen for 5 minutes after the diagnostic results are displayed, a screen saver will be activated and the results will disappear.

- To continue displaying the results, please touch the screen within 5 minutes.

- A stable Internet connection and Internet speed are required.

- If your Internet environment does not meet the requirements, the application will not run smoothly.

- Do not wipe the screen with water

- If you are concerned about dust on the mirror, do not wipe with water, but clean it with the cloth provided

- The mirror is heavy, so be careful not to pinch your fingers or other objects when installing or moving the product.

- If fingers or other objects get caught between the product and the floor, wall, etc. during installation or moving, injury may result.

- Do not scratch the glass surface with sharp objects.

- Scratches may cause lines to appear on the screen.

- Do not use the product, when the dust is on the outlet or the product itself.

- Using the product with dust on the outlet or this product itself, may cause an electrical leakage. Please clean up all the dust on the product to avoid any danger.
